

Repeal 1031 Exchanges?

Your Voice Matters. **Say NO to Congress!**

1031 Tax Reform FACT SHEET

Summary

Discussions to reform federal tax code are taking center stage. While the goal of the reform measures may be to make the tax code simpler and stimulate economic growth, the opposite will be the result.

With all recent proposals introduced, section 1031 is directly threatened. The current proposals will either completely eliminate or severely limit 1031 Exchanges. These proposals also significantly lengthen depreciation schedules for both personal property and real property assets and effectively raise the tax rate on recaptured depreciation for real estate, taxing it as ordinary income. Bottom line, the future of 1031 Exchanges or for those utilizing the power of tax deferral will be compromised.

Current Proposals

Tax reform proposals have been advanced by the House Ways and Means Committee, the Senate Finance Committee and the Treasury Department to eliminate or limit 1031 Like-Kind Exchanges. All of these proposals are currently in discussion form:

1. The House Ways and Means Committee draft Tax Reform Act of 2014 calls for repeal of section 1031 effective January 1, 2015.
2. The Senate Finance Committee's Discussion Draft: Cost Recovery & Accounting proposes to repeal section 1031, but leaves the door open for real property and intangible property exchanges. It also suggests a potential modification of the like-kind standard to the narrower section 1033 standard requiring that the properties be similar in service or use.
3. The Treasury's proposed FY2015 Budget proposes to limit real property exchanges to \$1 million annual gain deferral, but is silent about personal property exchanges.
